EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 1 of the specification, directly below the title, the following sentence has been added:

--This application is the national stage of PCT/FR03/03074, filed October 17, 2003, and published as WO 2005/047219 on May 26, 2005--.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the instant claims are drawn to a process for preparing 1,1-difluoroethane by the liquid-phase fluorination of 1,2-dichloroethane using hydrofluoric acid in the presence of a Lewis acid catalyst. The closest prior art of record, especially, U.S. 5,545,775 to Thenappan et al, teach such a process. However, the closest prior art fails to *teach or fairly suggest* conducting the process in the further in the presence of iron (III) chloride as co-catalyst, which, as exemplified by applicant in the instant examples and comparative examples, affords an unexpected and substantially higher yield of the 1,1-difluoroethane product then in the absence of said co-catalyst.

Art Unit: 1621

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
